

Regulatory Requirements

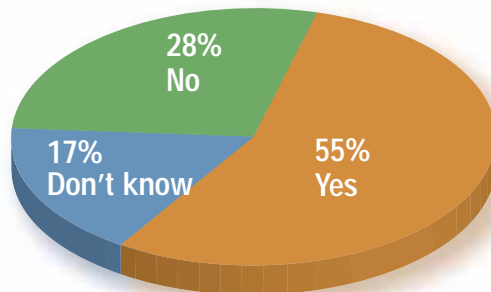

List Created of all Hazardous Waste

▶ 68% of facilities report having created a list of all hazardous pharmaceutical waste in their facilities.

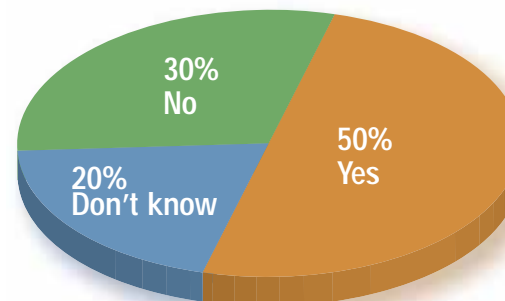

A majority of facilities report that they have created a list of all hazardous pharmaceutical waste in their facilities. However, not all of these facilities included off-formulary drugs ordered by their hospital in this review. Likewise, even fewer included drugs from all departments in this review, suggesting there is room for further improvement.

Off-Formulary Drugs Included in Review

◀ A smaller majority (55%) included off-formulary drugs in their review.

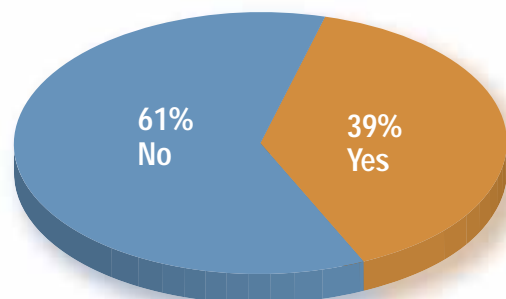

Drugs from All Departments Included in Review

◀ An even smaller number (50%) included drugs from all departments (i.e., radiology, nuclear medicine, etc.) in their review.

Regulatory Inspections

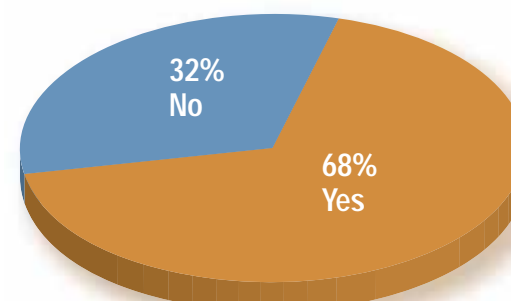

Recent Inspections by EPA or State Board of Pharmacy

▲ More than one third of facilities (39%) report having been inspected by the EPA or their state board of pharmacy within the past 18 months.

When it comes to regulatory inspections, 39% of facilities report having been recently inspected by the EPA or their state board. Of those involved with the inspections, 68% report being questioned about hazardous drug waste or RCRA compliance. While no reports of citations in the pharmacy were received, 15% of facilities received recommendations for their pharmacy.

EPA and State Boards Inspecting for Hazardous Drug Waste Compliance

◀ Of those inspected by the EPA or their state board of pharmacy, 68% were questioned about hazardous drug waste compliance.
